

## SmartWifi Toggler peut vous aider à économiser la batterie de votre mobile

Écrit par Domotics

Dimanche, 06 Janvier 2013 07:00 - Mis à jour Vendredi, 04 Janvier 2013 22:34

---

Certains smartphones deviennent vite à cours de batterie. Si on active le Wifi, le GPS, le Bluetooth, ... le smartphone peut avoir du mal à tenir une journée sur sa batterie. Le Wifi est responsable en partie car lorsque vous vous déplacez, le téléphone cherche des réseaux et multiplie des tentatives régulières de connexion.

Une solution, est d'utiliser une application comme Smart Wifi Toggler. Ça fonctionne sous Android, ça permet d'activer le wifi en fonction de votre localisation sur le réseau téléphonique (c'est à dire l'antenne GSM par laquelle vous passez).

# SmartWifi Toggler peut vous aider à économiser la batterie de votre mobile
